

Exact Birch–Swinnerton-Dyer Formula from Low Selmer Corank

Original summary — NOT the original paper or model card.

Repository manuscript; independent validation not established · October 7, 2026 [38]

Authors/source: OpenAI

Coverage: BSD principal

What the source reports

Claims full leading-term BSD only when some full q-power Selmer group has corank 0 or 1; not BSD for every elliptic curve. October 7 version removes an obsolete citation. [38]

Managing expectations

Not listed in current formalization.yaml sources; no verified full-paper formalization established here. No independent peer-review certification established by these repository materials. This brief reports the manuscript claim; it is not a verification of its proof. [38]

Original document and sharing status

The original source remains available at the official links below. Full-document redistribution permission was not established, or this topic has no standalone paper. Only this original summary is reproduced here.

Recorded rights: Root repository Apache-2.0; explicit paper/PDF redistribution scope not established [40]
