

The Selmer converse for elliptic curves at every prime

Original summary — NOT the original paper or model card.

Repository manuscript; independent validation not established · October 7, 2026 [\[41\]](#)

Authors/source: OpenAI

Coverage: BSD companion

What the source reports

Companion: low Selmer corank implies analytic/algebraic ranks and finiteness of Sha, not by itself the entire leading-term formula. [\[41\]](#)

Managing expectations

Not listed in current formalization.yaml sources; no verified full-paper formalization established here. No independent peer-review certification established by these repository materials. This brief reports the manuscript claim; it is not a verification of its proof. [\[41\]](#)

Original document and sharing status
